### CALADIUM ESCULENTUM

CALADIUM ESCULENTUM.

One of the most showy of ornamental foliage plants in cultivation, either for the conservatory or for planting out on the lawn; of easy culture and will grow in any garden soil. Leaves very large, of a green color, and beautifully veined and variegated with darker green. Plants should be abundantly supplied with water, which will produce a more luxuriant growth of leaves. In the autumn remove the roots to the cellar and pack in dry sand, out of the reach of frost. Every collection, however small, should contain at least one of these plants. For prices see above.

**BUBLS AND ROOTS—Continued****CANNAS**

These stately and deservedly popular plants are highly esteemed for their large and handsome foliage, brilliant flowers, and tropical appearance. Fine for a bed or group on the lawn; a place in the shrubbery border, or for banking the piazza. Cannas should not be planted out until all danger of frost is over. They can also be grown singly or in pots for decorating houses, halls, green-houses, etc. The roots should be stored in the cellar in Autumn before the foliage is touched by frost. The varieties offered by us are the most attractive and desirable and embrace new and popular varieties as well as standard sorts.

## DAHLIAS

The Dahlia is too well known to require comment on its beauty and popularity. Its colors are beautiful and varied, from white to almost black; its form is perfect. The roots of the Dahlia are very tender, and are easily destroyed by frost; they, therefore, should not be set out until all danger of frost is over in the spring. Our collection this season is very fine.
